
The Touch Laser Photo.epub is a revolutionary product that will change the way you share your memories with the world; it offers an unprecedented upgrade to photo printing, making it easy to create professional-quality prints. The Touch Laser Photo, like its name suggests, outputs inkjet photos faster than any laser printer on the market. The printer can produce up to 18 pages per minute (PPM) in monochrome and up to 16 PPM in color. What's more? It uses 30% less ink than other printers on the market! And emitting no harmful substances like toner or ozone into the air makes this an even greener machine for your home or office. It's also the only printer on the market that lets you print from your iPhone, iPad, and Android devices over a wireless network. It's the perfect tool for printing photos from a recent vacation or a family reunion. The Touch Laser Photo features a touchscreen interface that takes all the guesswork out of printing. You can see how many pages you have left in your ink tank and even track the status of your print jobs from anywhere in your home. It has an easy-to-understand icon-driven menu for simple navigation and lets you select from different resolution settings including Standard, Fine, Enhanced, and SuperFine. It offers a variety of print options including two-sided printing, 4"x6" letter size, and even offers CD/DVD printing. The Touch Laser Photo is Wi-Fi compatible and allows you to print from different computers and mobile devices through a network. You can create your own home or office wireless network with this printer. The Touch LCD touchscreen has many features that are all controlled by touch screen including the ability to switch between different menu settings for optimal performance based on the type of photos you are printing. It has 38-bit color processing capabilities that provide vibrant colors when you are making your prints. The Touch Laser Photo also has the ability to print on all kinds of media including photo paper, photo board, canvas, and even on card stock. It will create professional-quality prints with tones that are crisp and clear even when you are printing photos on non-photo paper or using a different media type. This is possible because it features a dust-proof fanless design for your home or office printing needs. The Touch Laser Photo is an excellent digital photo printer. It has a print resolution of 4800 x 600 dpi and an impressive text area of 5"x8.5". It has the ability to store up to 250 prints on its memory card. This unit can be connected to your computer using USB, Ethernet, Wi-Fi, or via Windows® Printer Management Console (PMC). It also features PictBridge technology that allows you to connect it directly to your digital camera for printing photos without the need for a computer connected to your printer.
